1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On line 4 of page 1 of the specification, after "2002", the following has been inserted; --, now patent number 6,857,346--.

2. Made of record but not making Applicant's invention obvious are patents to Oberloier and Guzman showing angled rotary cutters cutting objects on a turret. There is no suggestion to combine these references with the likes of Cimperman to arrive at the claimed invention.
3. In claim 1, it has been interpreted that "substantially vertical" does not encompass "at a slight angle from the vertical". In other words, the cutting wheel axis is oblique to the turret axis.
